Network	<ul style="list-style-type: none"> • Router/Switch Monitoring 	<ul style="list-style-type: none"> • Firewall Monitoring • Router Monitoring • Switch Monitoring

Managed Endpoint Detect & Response (NextGen AV)

Win the Ransomware Battle with Managed EDR

Why is Managed Endpoint Detection and Response (EDR) the best choice now for your IT security and business continuity?

Managed Endpoint Detection and Response

- ✓ Help prevent ransomware by rolling back devices to their pre-infection state.
- ✓ Use artificial intelligence (AI) to detect and prevent both current and emerging threats, with continual updates to the platform.
- ✓ Monitor processes before, during, and after execution, to prevent new threats from slipping in.
- ✓ Monitor your systems in real-time.
- ✓ Keep device performance fast with continual monitoring.

Anti-Virus Solutions

- ✗ Can't roll back to a pre-infection state, increasing your ransomware risks.
- ✗ Use signatures to identify threats, meaning capabilities lag behind cyber-attackers' latest strategies.
- ✗ Fly blind during execution, creating an entry point for new threats from savvy attackers.
- ✗ Rely on daily or weekly scans, increasing your risks.
- ✗ Can slow down your device performance with long scans.

A SIMPLE CLICK & RESTORE IS ALL YOU NEED TO COUNTER RANSOMWARE!

Scan to find out more info.

Email Protection & Archiving

Sophisticated Protection for Your Business at an Affordable Price

- Round-The-Clock Detection & Defense System
- Malware Detection + Antivirus (AV) Technology
- Threat Detection + Spam Filtering (24/7)
- Always-on Business Continuity
